Example of how to use repeaters as beacons.

Stations in Whangarei who have seen the Hepburn index

http://www.dxinfocentre.com/tropo_au.html

can key up node 6713 that will activate the Mt Climie 730 repeater.

Using a hand held to access via node 6095 on the ZL1AM 870 UHF repeater.

TX into 870 and listen for carrier in either USB, CW or FM.

If 730 Wellington is heard then the band is open on VHF.

The same applies to Echo Link, D-Star and YSF
